## Optimization projects in the CAD/PLM environment

### Siemens NX or SAP-ECTR

PLM projects usually require specific knowledge and experience, so we offer you support in such projects or manage them for you.

- (Partial) project management for the evaluation and introduction of a new CAx/PLM system
- (Partial) project management for updates of Siemens NX or SAP-ECTR
- Development of concepts around your PLM environment
- Creation or revision of CAD guidelines
- Setting up libraries (symbols, reusable objects, standard parts) in Siemens NX
- Support in many other projects in the CAx/PLM environment

The services are aimed at system managers and system administrators.

Expenditure according to specifications, dates on request

Support by third party providers such as Siemens Digital Industry Software AG or DSC Software AG must be booked separately by the customer.

## Workshop methodology in PLM environment

Siemens NX, Teamcenter or SAP-ECTR

The aim of this workshop is to review and, if necessary, revise the methodology, with the effect of increasing quality and efficiency.

- Review and optimization of the existing methodology and processes
- Development of new methodological approaches according to the initial situation
- Development of recommendations for action

The workshop is aimed at users, development teams, key users, system administrators.

1-5 days, dates on request

## Workshop PMI Siemens NX

The workshop should show how PMI information can be applied in your company or group and which advantages result from the use of PMI. The workshop is also suitable for evaluation procedures in process management.

Content workshop day:

- Analysis of application possibilities
- Development of decision bases for the use of PMI information
- Development of company-specific PMI guidelines
- Basics of PMI and their application in Siemens NX
- Support with process definitions

*In addition, a training course on PMI is also offered.*

The workshop is aimed at NX users, key users, system administrators and system managers.

The workshop is primarily intended for business consulting.

1 day, dates on request

## Workshop Data Quality

Siemens NX, Teamcenter or SAP-ECTR

Fast 3D visualizations or a functional digital twin require good data quality. Configurable test routines check your CAD data and report events within seconds. Early error detection ensures productivity.

In a workshop, we identify the needs and support you in evaluating the optimal instruments. We help with the configuration of test routines based on your specifications.

The workshop is aimed at development managers, production managers, key users and system administrators.

1- 2 days, dates on request

## Workshop Continuous Education Siemens NX

Software updates are carried out faster and more regularly to eliminate errors, improve security and increase productivity. However, users often know too little about the new features and continue to work as usual according to the same patterns.

With the new NX 1847 release, the training concept for employees also becomes a challenge, as an update is available every six months.

We work with you to develop the appropriate future training concept and support you in choosing the optimal training methodology and the necessary documentation. In doing so, you benefit from our experience in modern teaching methods.

The workshop is aimed at users, key users, system administrators and system managers.

1- 2 days, dates on request

## Workshop customer specific Siemens NX, Teamcenter or SAP-ECTR

The aim of these workshops is to find solutions to customer-specific challenges with the help of Marengo AG's well-founded know-how.

The contents can be tailored to your specific needs. Some examples are:

- Support in NX Installation & Customizing
- Possibilities and limits of NX applications
- Evaluation of new technologies
- Use of the reuse library
- Visual Reporting with HD3D
- Data migration

NX users, key users, system administrators and system managers

1- 5 days, dates on request
